ULTRA MATERIALS

How materials innovation is changing the world

by George M. Beylerian & Andrew Dent

Following up on our ground-breaking first book – Material ConneXion – we are pleased to announce the arrival of Ultra Materials, our sophomore effort. I.D. magazine called it a “must have,” and we’re sure that you’ll agree. Filled with interviews with Philippe Starck, Marcel Wanders, Patricia Urquiola, David Adjaye (and many more); up-to-date technological information; and hundreds of new materials and applications, Ultra Materials will inspire and inform.
