

FLEXIBLE SYNTHETIC-FUR FABRIC

Furore is a porous, synthetic-fur fabric inspired by expanded-metal technology. Designers Yvonne Laurysen and Erik Mantel developed the product for LAMA Concept using a special cutting technique. Furore is soft, light, and very flexible and is available in long- and short-hair formats as well as in various colors. The Interior collection includes plaids, bedspreads, and cushions, while the Fashion collection includes scarves, hats, and hair bands.

CONTENTS

70% acrylic, 30% cotton
(top); 100% wool (backing)

APPLICATIONS

Bedspreads, plaids,
cushions, acoustic noise
reduction, apparel,
aesthetic applications

TYPES / SIZES

Long- and short-hair types,
eight colors, custom-made
sizes and colors

ENVIRONMENTAL

Efficient use of material

LIMITATIONS

No washing

PRESSED WOOL-FELT CARPET

Designers Yvonne Laurysen and Erik Mantel developed Cell while exploring alternative methods of fabricating carpet for LAMA Concept. Unlike conventional carpets, Cell is not produced with a loom, knitting machine, tufting technique, or textile printing. Cell carpet is made of 100 percent industrial wool felt that is pressed and cut into strips. Wool felt is a natural product that is nonflammable, water repellent, breathable, and acoustically absorptive. The size of the carpet is determined by the number of strips used, which are assembled randomly in order to develop a natural pattern with a varied edge.

Cell strips are offered in thirty-two colors, and individual strips may be ordered as replacements. Cell carpet is also offered with integrated LED lights as well as light-reflecting Swarovski stones.

CONTENTS

Wool felt, PVC-coated woven polyester fabric backing

APPLICATIONS

Flooring, wall cladding, acoustic noise reduction, aesthetic applications

TYPES / SIZES

Cell, Cell + LED, Cell + Swarovski; available in 32 colors; 35 7/16 x 35 7/16" (90 x 90 cm) tiles as well as custom sizes

ENVIRONMENTAL

Wool is renewable, recyclable

LIMITATIONS

Not for exterior use

TEXTILE AND ALUMINUM ACOUSTIC WALL PANELS

Wave is a system of acoustic wall panels made of fire-retardant foam covered with open-structure textiles and pressed into a matte-coated aluminum frame. Creating a acoustic panel more visually arresting than its counterparts, designers Yvonne Laurysen and Erik Mantel cut sweeping, curvilinear forms within aluminum frames that enclose textured fabric panels. The panels are intentionally tillable, creating a seamless graphic pattern when connected. Although the fabric and metal are rendered in the same color, the different finishes express the colors differently depending on the viewing angle.

CONTENTS

Fire-retardant foam, open-structure textiles, aluminum frame

APPLICATIONS

Wall cladding, acoustic noise reduction, aesthetic applications

TYPES / SIZES

47 1/4 x 23 5/8" (120 x 60 cm), custom sizes and colors possible

TESTS / EXAMINATIONS

Not for exterior use
